OTHER

Short Description: Single-LED, T6.9, Red, 48 V AC/DC +10%

Kind of illumination: Single-LED

Hints: Order two LEDs

For LED element fitting information see Application guidelines, LED polarity
Due to high surface temperatures, the series resistor must not be soldered directly

to the terminals of the equipment (use a terminal plate)

When using AC/DC types with AC operation, slight flickering can occur

The luminous intensity stated is for when used with DC

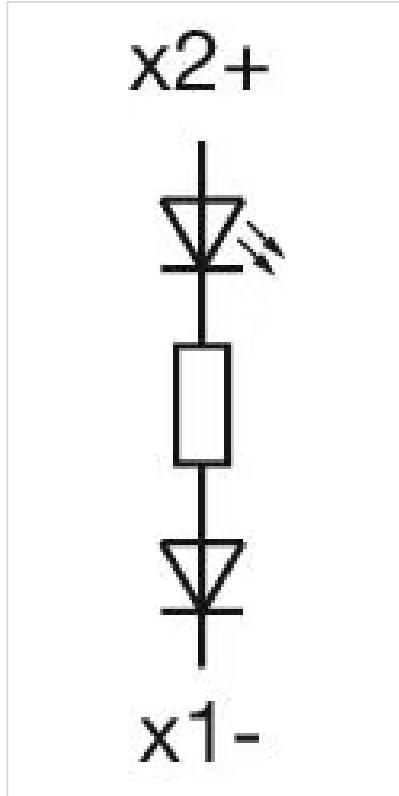

Electrical and optical data are measured at 25 °C

The specified versions are built with a protection diode (half wave rectifier) in
series and the LED

Luminosity and wave length variations caused by LED manufacturing processes
may cause slight differences regarding the illumination.

Where supply voltages are over 48 V, a voltage-reduction element (external protective series resistor) must be used.
