MECHANICAL CHARACTERISTICS

Terminal: Screw terminal

Contact material: Silver

Switching system: Slow-make switching element

Switching system: The double-break, slow-make switching element is equipped with normally open or

normally closed contact. The normally closed contact has forced opening.

Up to six switching elements can be snapped to each holder.

The NC contact opens automatically upon disconnection of the actuator. On

delivery, the contact is open (= safe state).

Activation (= NC contacts on the non-actuated commanding device are closed) takes place upon first-time actuation after the contact block is snapped onto the

actuator.

Mechanical lifetime: 10 Mil. cycles of operation

Tightening torque: 0.8 ... 0.9 Nm

Operating frequency: Max. 3 600/h

Terminal details 1: Solid 2 x (1.0 ... 1.5mm²)
