#### MECHANICAL CHARACTERISTICS

**Terminal:** Spring-type terminal

**Contact material:** Silver

<b>Switching system:</b>	Slow-make switching element
<b>Switching system:</b>	<p>The double-break, slow-make switching element is equipped with normally open or normally closed contact. The normally closed contact has forced opening. Up to six switching elements can be snapped to each holder. The NC contact opens automatically upon disconnection of the actuator. On delivery, the contact is open (= safe state). Activation (= NC contacts on the non-actuated commanding device are closed) takes place upon first-time actuation after the contact block is snapped onto the actuator.</p>
